

The redesignation form consists of three parts:

Part I - Institutional Profile

Part II - Terms of Reference (TOR)

Part III – Workplan

This redesignation form below, together with the Terms and conditions for WHO collaborating centres will serve as the agreement between the proposed institution and WHO if the redesignation as WHO collaborating centre is approved by WHO. Completion and submission of the redesignation form, however, does not guarantee that the designation will be approved.

Folder eCC_00015006 is in stage Form_Completion_Inst

Name of the University, Hospital, Research Institute, Academy or Ministry	
Iran University of Medical Sciences	
Name of the Division, Department, Unit, Section or Area	
School of Behavioural Sciences and Mental Health, Teheran Institute of Psychiatry	
City	CC Reference Number
Teheran	IRA-22
Title	
WHO Collaborating Centre for Mental Health	

Part I - Institutional Profile

The majority of designations as WHO CC are given to a part (e.g. department, division, unit, etc) of an institution, as opposed to the institution as a whole. Example: the Department of Microbiology of the University of ABC. In those cases, when a question in the designation form refers to the "institution", please only provide information about the concerned part (e.g. the Department of Microbiology) of the institution and not about the institution as a whole (e.g. the University of ABC). Where information about the institution as a whole is being required, this will be clearly stated.

The term "WHO CC" means the (part of the) institution designated as a WHO collaborating centre while performing the agreed terms of reference and work plan with WHO (as opposed to the institution performing other activities outside the agreed terms of reference and workplan). Example: Department of Microbiology of the University of ABC, when working on activities included in this designation form and agreed with WHO.

A WHO CC is not a legal entity. The legal entity which controls and is responsible for the WHO CC is the institution or the ministry, academy, university, established research institute or hospital of which the institution forms part.

Address of the proposed institution

1.1 Street and number	No1 Shahid Mansuri St., Niayesh St., Sattarkhan Ave.
1.2 City	Teheran
1.3 State/Region/Canton/Province	Teheran
1.4 Postal Code	1445613111
1.5 Country	IRA

1.6 WHO Region EMRO
 1.7 Phone (98-21) 66513250
 1.8 Fax (98-21) 665 550200
 1.9 Web site <http://www.iums.ac.ir/>

Staff of the proposed institution

1.10 Name of the director of the institution as a whole

Prof. jafar Bolhari

Head(s) of the proposed WHO collaborating centre

Salutation	First Name	Last Name	Email Address
Dr.	Seyed.Kazem	Malakouti	whocc.tip@iums.ac.ir
Salutation	First Name	Last Name	Email Address
	Mahmoud	Dehghani	

1.12 Please list the names of professional staff working at the proposed institution together with their professional qualifications (e.g. Dr John Smith MPH). Please do not include full resumes or biographies.

Dr. Mahmoud Dehghani, PhD, clinical psychologist, faculty member of school of behavioral sciences and mental health

Sources of funding

Note: The reference to companies in this form includes trade associations and foundations closely associated with their commercial sponsors. The reference to "companies engaged in activities relating to tobacco" includes companies engaged in the manufacture, distribution and/or sale of tobacco or tobacco products and subsidiaries of such companies (including holding companies).

1.13 During the last two years, what percentage of the proposed institution's funding was core funding? Core funding refers to funding that is received by the proposed institution in a regular manner (e.g. a specific amount received annually from a secure source), as opposed to ad-hoc contributions that are received once or at irregular intervals.
 over 75% regular (core) funding

1.14 Did over the last three years, does currently, or is there a prospect that, the institution as a whole will receive funds from one or more companies whose business activities are incompatible with WHO's work (e.g. companies engaged in activities relating to tobacco)?

Yes No

If "Yes", please provide details (i.e. names of companies, their business activities, level of funding, for what such funding was, is being, or will be, used, together with an indication whether such funding has stopped (and if so, the year in which it stopped), or is current or prospective.

1.15 Does the proposed institution currently, or is there a prospect that the proposed institution will, receive funds from one or more companies that have, or may be perceived as having, a direct or indirect commercial interest in the activities being conducted by the proposed institution as part of its terms of reference as a WHO collaborating centre?

Yes No

If "Yes", please provide details (i.e. names of companies, their business activities, level of funding, for what such funding is being, or will be, used, together with an indication whether such funding is current or prospective).

1.16 Does the proposed institution currently, or is there a prospect that the proposed institution will, perform research or other work commissioned by industry as part of its terms of reference as a WHO collaborating centre?

Yes No

If "Yes", please provide details (i.e. description of the research or other work, names of companies by which the research or other work is being commissioned, the business activities of these companies, and a clarification of the amounts charged for this research or other work, i.e. whether these amounts are charged on a cost recovery basis or any other basis).

1.17 Does the proposed institution currently, or is there a prospect that the proposed institution will, receive unspecified funds from one or more companies which it is planning to use directly or indirectly for the implementation of the agreed terms of reference as a WHO collaborating centre?

Yes No

If "Yes", please provide details (i.e. the names of companies, their business activities, level of funding, for what such funding is being, or will be, used and whether the institution is dependent on the support of one or more of these companies for its continued operation).

1.18 Does the proposed institution currently, or is there a prospect that the proposed institution will, receive funding from one or more companies to support the salary of specific staff or posts working on the activities conducted as part of its terms of reference as a WHO collaborating centre?

Yes No

If "Yes", please provide details (i.e. names of companies, their business activities, level of funding, for which staff or what posts such funding is being, or will be, used, and the functions of such staff and/or posts).

1.19 Did over the last three years, does currently, or is there a prospect that, any staff of the institution designated to work on the activities of the WHO collaborating centre, including the proposed head(s) of the WHO collaborating centre, have any other interactions, affiliations or relations with, or any other personal, professional, financial or business interests in, one or more companies that could give rise, or be seen as giving rise, to a conflict of interest?

Such a conflict could exist:

(i) if the company has, or may be perceived as having, a direct or indirect commercial interest in all or part of the activities being conducted by the proposed institution as a WHO collaborating centre;

(ii) if the business activities of the company are incompatible with WHO's work (e.g. companies engaged in activities relating to tobacco); or if the company has (or may be seen as having) a vested interest in exerting influence on the activities of the WHO collaborating centre and/or their outcome.

Interactions, affiliations, relations with, or other personal, professional, financial or business interests include, but are not necessarily limited to, collaborative projects or initiatives, employment, consultancy, investment interests (e.g. stocks, bonds, stock options, other securities, but not mutual funds, pension funds or similar investments that are broadly diversified), commercial business interests (e.g., proprietorships, partnerships, joint ventures), patents, trademarks, or copyrights (including pending applications), proprietary know-how in a substance, technology or process.

Yes No

If "Yes", please provide details (i.e. names of the companies involved, their business activities, the nature of the interactions, affiliations, relations, or other personal, professional, financial or business interests, and the value of or income generated through such the interactions, affiliations, relations or other interests, together with an indication whether the interactions, affiliations, relations, or other personal, professional, financial or business interests in question have stopped (and if so, the year in which they stopped), or whether they are current or prospective).

1.20 Please attach a current organizational chart (1 page) of the institution as a whole, including its sub-parts such as divisions, departments, sections, unit or areas (whichever structure applies), indicating the part proposed as WHO collaborating centre.

Top chart of School of Behavioral Sciences and.pptx

1.21 Please list major facilities and any specialized equipment available to the proposed institution (e.g. laboratories, training facilities, documentation centre), if applicable. Please do not list general office space or standard office equipment.

1. psychological tests reservoir
2. neuro-psychological laboratory, affiliated with department of psychiatry
3. bi-direction mirror for interview
4. memory clinic, affiliated with geriatric medicine
5. neuro-imaging facilities, affiliated with radiology and nuclear medicine department

1.22 Does the proposed institution currently establish a smoke-free environment across its premises, which can be illustrated either through a documented institutional/departmental policy or through the existence of national/local smoke-free legislation? The smoke-free environment must apply to all indoor workplaces and public places of the institution's premises, and must entail a complete ban of smoking indoors and no areas designated for smoking.

No

The proposed institution agrees with the following Terms and conditions for WHO collaborating centres.

Part II - Terms of Reference (TOR)

Please include the proposed terms of reference for the future collaboration between the proposed institution and WHO, as discussed prior to completing this form. In most cases, 1-3 TOR will be sufficient to provide a high-level framework of the future collaboration. For redesignations, the current terms of reference is automatically prefilled but can be revised as appropriate.

For detailed instructions on how to fill in this section please click on the link provided at the top of the form.

- TOR 1** Undertake and Promote implementation research in the area of the integration of mental health into primary health care including in urban and peri urban settings, including Prevention of Suicide and alcohol and substance use disorders .
(This is the previous term of reference with new modification)
- TOR 2** Collaboration in scaling up mental health services and building the capacity of general health care personnel to deliver basic mental health services and intervention in line with the mhGAP initiative of WHO.
(This is the new term of reference)
- TOR 3** Collaboration with regional and global entities and organizations for raising political commitment and support for mental health with special emphasis on development of and involvement of the civil

society organizations in line with the provisions of the mental health action plan 2013-2020 and the Regional framework for scaling up action on mental health 2016-2020.
(This is the previous term of reference with new modification)

- TOR 4** Support developments of models of care aimed at scaling up delivery of mental health and substance use services in line with the provisions of the mental health action plan 2013-2020 and the Regional framework for scaling up action on mental health 2016.
(This is the new term of reference)

Part III – Workplan

<p>Activity ID 23567</p>	<p>Activity title Assessing the feasibility and providing a new version of National Registration System</p> <p>Link to TOR TOR1</p> <p>Name(s) of responsible staff at the institution Dr. Seyed Kazem Malakouti, Dr. Ahmad Hajebi</p> <p>Type of activity Evaluation</p> <p>Description of the activity and how it is implemented the WEB-based registration system has been established in 2010 nationwide in PHC network. the current evidences showing that the efficacy for collection the reliable data is lower than expected comparing with research studies. this study aim to evaluate the current registration system to find out the gap and providing the updated collection system by improving the PHC capacities. for implementation, the current activities will be scrutinized, by collecting the data. the standard system according to the MoH, bureau of mental health will be determined, the gap between the standard and operating will be identified and then the new version according the capacities and future expectations will be provided. the new collection and collation instruction for PHC health personnel will be provided to update the web-base collection system.</p> <p>Expected deliverables</p> <ol style="list-style-type: none"> 1. to identify the gap between the current web-base data collection system with the research findings 2. to identify the shortcoming of current data collection system 3. to provide the updated new version of web-based data collection 4. to provide new instruction of data collection for the health workers of PHC network <p>WHO Deliverable (Top Task) -</p> <p>Name(s) of funding sources WHO, IRAN OFFICE, Ministry of Health, Mental health Bureau</p> <p>Activity timeframe two years. 3 months for providing the checklists for the current activities and standards requirements 6 months for data collection 3 months for data collation and interpretation 3 months for providing the new and updated version 3 months for providing the new version of instruction</p> <p>This activity has been specifically developed for the workplan of the WHO collaborating centre and does not constitute a standard activity of the institution without WHO involvement.</p>
---------------------------------	--

<p>Activity ID 23578</p>	<p>Activity title Assessing the feasibility and providing a new version of national suicide prevention program</p> <p>Link to TOR TOR1</p> <p>Name(s) of responsible staff at the institution Dr. Ahmad Hajebi , Dr. Seyed Kazem Malakouti</p> <p>Type of activity Research</p> <p>Description of the activity and how it is implemented The current evidences showing that the current program of suicide prevention could cover just 50% of the country. This study tries to find out the barriers of the implementation of the program such as the personnel capacities, the feasibility and the execution defects. The standard program according to the MoH, Bureau of Mental Health will be determined, the difference between the implemented program and the expected one will be identified and then the new version according to the capacities and future expectation will be provided.</p> <p>Expected deliverables 1. to identify the barriers for complete implementation of the program 2. to provide the new version of the program 3. to provide the new instruction of implementation for the health workers of PHC network</p> <p>WHO Deliverable (Top Task) -</p> <p>Name(s) of funding sources WHO, IRAN OFFICE, Ministry of Health, Mental health Bureau</p> <p>Activity timeframe two years. 3 months for providing the checklists for the current activities and standards requirements 6 months for data collection 3 months for data collation and interpretation 3 months for providing the new and updated version 3 months for providing the new version of instruction for health workers of PHC network</p> <p>This activity has been specifically developed for the workplan of the WHO collaborating centre and does not constitute a standard activity of the institution without WHO involvement.</p>
<p>Activity ID 23618</p>	<p>Activity title implementing Urban Mental Health program as a pilot study and providing community field for education, research and treatment</p> <p>Link to TOR TOR4</p> <p>Name(s) of responsible staff at the institution Dr. Khadem Alreza, Dr. Seyed Kazem Malakouti</p> <p>Type of activity Provision of reference substances and other services New model of Urban Mental Health developed collaborating with WHO/EMRO, MoH/MHB.</p>

Description of the activity and how it is implemented	<p>First, in this model the principles of WHO based on General Physician to provide mental health services have pivotal roles. Second, collaborating between stakeholder organizations which are involved in provision of mental health services such as welfare organization, municipality and Ministry of Health, NGOs on mental health and charity organization has been speculated. Third, professional services will be provided by psychiatrist for mentally ill patients particular in acute phase and will supervise the GPs in PHC network in a regular manner. This program will be implemented as a pilot study and a action research study in one of the district of Tehran and through this implementation an educational, research and treatment community field will be introduced as a unique model of multidisciplinary of community services. Furthermore, furnishing the current educational program by study course of fellowship in community psychiatry will fortify the mental health community network.</p>
Expected deliverables	<ol style="list-style-type: none"> 1. provide a field of educational, research and treatment based on community services. 2. to evaluate the feasibility of Urban Mental Health model in one of the district area of Tehran 3. the test the collaboration of multiple organizations which are currently involved in provision of mental health services 4. to provide a background for fellowship of community psychiatry
WHO Deliverable (Top Task)	-
Name(s) of funding sources	<p>- the fund has not determined yet. most probably by:</p> <ul style="list-style-type: none"> - Iran University of Mental Health - National Network of mental health research
Activity timeframe	<p>since 2016-2019</p> <ul style="list-style-type: none"> 3 months to determine the district area 6 month to provide the required manuals 12 months to implement the program 6 months to provide the required documents
<p>This activity has been specifically developed for the workplan of the WHO collaborating centre and does not constitute a standard activity of the institution without WHO involvement.</p>	

<p>Activity ID 23619</p>	<p>Activity title support the Iranian Scientific Society for Suicide Prevention to publish an open access scientific journal in english language, involving the regional experts</p> <p>Link to TOR TOR3</p> <p>Name(s) of responsible staff at the institution Dr. Seyed Kazem Malakouti</p> <p>Type of activity Information dissemination</p> <p>Description of the activity and how it is implemented 1.to Publish and disseminate an open access, English language, peer review scientific journal on suicide with name of: suicide prevention journal. 2. receiving the approval of Ministry of Health of Iran for the journal of "suicide prevention journal", affiliated to Iranian Scientific Society for Suicide Prevention 2. to collaborate with regional organizations and experts to publish on regular basis 3. to disseminate the regional provided scientific information among the state members 4. to collaborate with the international experts to provide reliable and valid information and services for the region state members</p> <p>Expected deliverables 1. to publish online journal on suicide behaviors for the EMR 2. to disseminate the scientific information regarding the region 3. to provide a network collaborated with the experts of the region</p> <p>WHO Deliverable (Top Task) -</p> <p>Name(s) of funding sources Iranian Scientific Society for Suicide Prevention most probably involving with the regional organizations</p> <p>Activity timeframe launch from 2016</p> <p>This activity has been specifically developed for the workplan of the WHO collaborating centre and does not constitute a standard activity of the institution without WHO involvement.</p>

<p>Activity ID 23620</p>	<p>Activity title Collaboration with WHOCCs of Morocco, Pakistan at EMR to provide services for disasters, registration system and suicide prevention program, scaling up mental health services PHC, Scaling up opioid dependence prevention</p> <p>Link to TOR TOR3</p> <p>Name(s) of responsible staff at the institution Dr. Saberi Zafaghani, Dr. Khadem Alreza, Dr. Jafar Bolhari, Dr. Malakouti</p> <p>Type of activity Coordination of activities carried out by several institutions (e.g. other WHO collaborating centres)</p> <p>Description of the activity and how it is implemented 1. collaborate with WHOCCs of the EMR on the following activities: 1-1. establishing and scaling up the registration system on suicide behaviors 1-2. establishing and scaling up the substance abuse treatment focused on MMT services 1-3. scaling up the mental health services base on PHC 1-4. implementing programs to tackle the natural and man-made crisis</p> <p>Expected deliverables 1. to hold collaborative seminars among the WHOCCs on the region 1. to implement shared programs on suicide registration and prevention among them 2. to implement shared programs on substance abuse treatment and prevention services 3. to implement shared research and services on tackle the natural and man made crisis among them</p> <p>WHO Deliverable (Top Task) -</p> <p>Name(s) of funding sources WHO/EMRO WHOCCs's organizations of the EMR</p> <p>Activity timeframe 2016-2020</p> <p>This activity has been specifically developed for the workplan of the WHO collaborating centre and does not constitute a standard activity of the institution without WHO involvement.</p>
<p>Activity ID 23629</p>	<p>Activity title Integration of psychosocial intervention into CMHC (Community Mental Health Center)</p> <p>Link to TOR TOR4</p> <p>Name(s) of responsible staff at the institution Dr. Banafsheh Gharraee, Dr. Jafar Bolhari, Dr. Mojgan Lotfi</p> <p>Type of activity Training and education</p> <p>Description of the activity and how it is implemented Given the habitation of 70% Iranian population in urban areas and their considerable mental health needs, the first CMHC was established in Tehran in 2010. However, it seems that there are some gaps and deficiencies in the implemented programs. The present project aims to collect the existing national wide data</p>

Collaborating Centres REDESIGNATION FORM

and experiences in implementing CMHC program and integrating mental health services in PHC over the past few years, to evaluate the delivered CMHC services. Adding psychosocial interventions into current operative CMHC is the principle aim of this study. This project will be implemented in the following phases: 1) The exploration existing status of mental health and its services in Iran based on current professional experiences (focus group and deep interview) and literature review; 2) The exploration of present performance of community mental health centers (CMHCs) in Iran and world based on current professional experiences (focus group and deep interview) and literature review; 3) The selection and integration of community mental health services into family physician program based on feasibility, justice and cost-effectiveness criteria; 4) Designing structure and implementation program of selected services for community mental health centers (CMHCs); 5) Pilot implementation of the designed CMHC model in two centers; 6) Evaluation of the implemented CMHC model in terms of applicability and cost-effectiveness.

Expected deliverables

- To identify the differences between local (Iranian) CMHC and worldwide CMHC programs,
- To identify the deficiencies of local CMHC services in fulfilling the patients needs,
- To provide new psychosocial interventions in order to implementing in local CMHCs,
- To provide the evaluative data about applicability and cost-effectiveness of all implemented services and interventions in implemented local CMHCs.

WHO Deliverable (Top Task)

-

Name(s) of funding sources

Ministry of Health, Mental health Bureau;
WHO, IRAN OFFICE,

Activity timeframe

4 months for data collection in literature review
4 months for data collection in focus group and deep interview
4 months for designing new psychosocial interventions in order to implement in new model of CMHC
6 months for implement new psychosocial interventions in two CMCH centers
6 months for evaluating the delivered services and interventions in two CMCH centers

	<p>This activity has been specifically developed for the workplan of the WHO collaborating centre and does not constitute a standard activity of the institution without WHO involvement.</p>
